***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-18, drawn to a distribution request for music content data, classified in class 455, subclass 414.1.

II. Claims 19, drawn to a distribution from sound information service provider which collects a fee from the user and service provider collects sale commission from the charged sound information provider, classified in class 715, subclass 500.1. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because service provider collects sale commission from the charged sound information provider. The subcombination has separate utility such as a cellular phone which has a special service request and pay for music content data.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
